Libraries and Frameworks: Express, React, Next, Django

Databases and other: RESTful Routing, PostgreSQL, Google Auth, JSON API, Google Books API

Interpersonal skills: Strong rapport-building ability, high degree of openness, highly adaptive, and diligent team player

TECHNICAL PROJECTS

Kavorka - [GitHub](#) | [App](#) - MongoDB | Express | Node.js | HTML5 | CSS3 | Google OAuth

Strength and conditioning coaches can assign athletes to customized workouts

- Assembled a React front-end service to create workouts, assigned athletes, and assignment dates
- Constructed CRUD operations for a non-technical userbase to add text-based exercises and workouts
- Integrated Google OAuth to authenticate users

DreamMapper - [GitHub](#) - MongoDB | Express | React.js | Node.js | HTML5 | CSS3 | Materialize CSS

Users create notecards on concept boards to facilitate dream recall

- Implemented React for dynamic front-end rendering and routing
- Utilized JWT to authenticate users statelessly to facilitate scaling

Novel Nest - [GitHub](#) | [App](#) - Python | Django | HTML5 | CSS3 | Materialize CSS | PostgreSQL

Users subscribe to an e-book genre to receive 5 randomized books

- Collaborated with a team of 3 remote engineers to build an e-book subscription service using Google Books API
- Stylized images and cards with Pexels for images, later edited with Canva and hosted on Imgur for hyperlinking
- Managed a SQL database to render data associated to users, genres, subscriptions, and credit cards
